EDUCATION

- **M. Tech in Electronics** from Sir MVIT, Bangalore, India. Completed in 2013.

Project work: A Lossless Compression scheme for Bayer's colour filter array Images.

Work included: The above said project can efficiently and effectively de-correlates the data dependency in both spatial and color spectral domains. It also provides the best average compression ratio as compared with the other lossless image compression schemes

- **B.E in Electrical & Electronics** from PES college of Engineering, Mandya, Karnataka, India. Completed in 2004.

Project work: Power measurement using Electronic Energy meter

Work included: To measure accurately the energy consumed using Electrical Standards & formulas. It also generates accurate meter readings based on precise mathematical computations up to desired fractions & decimals and to produce cost effective replacement for electromechanical energy meter.

PROFESSIONAL EXPERIENCE

5 years of experience in teaching

AREAS OF INTEREST

Digital Electronics, Electronic circuits & Network Analysis.
